Empowering Energy Leaders **Globally**

Get ready for Smart Metering with our DCC-enabled platform and managed service packages for independent suppliers.

It's time to get smart.

Use our dedicated DCC-friendly interface platform for Smart Metering; featuring full automation, system scalability and operational exception handling for our managed services team.

We've made a wealth of energy suppliers smart meter ready - leading industry evolution across the UK. we're constantly refining the process to make DCC compliance faster, more efficient and at less risk to your business.

A wealth of smart meter experience

BOL is our comprehensive, industry exclusive, automated interface platform developed to communicate with DCC whilst handling high level transactions and allowing for integration with your CRM billing provider.

Automated transactions with UI

Liberate your registration and administration process by using our managed services team, covering DCC adapter integration, smart meter signups and so much more.

Full support from Managed Services

![esg logo]

BEIS expect suppliers to install 51 million homes with Smart Meters by 2024.

Smart Meters communicate with the Data Communications Company (DCC), providing real time data, allowing for accurate billing and faster switching – features customers are actively seeking when choosing their utility suppliers.

Any direct or automated interaction with the DCC requires an integrated DCC adapter, full service accreditation and the technical ability to integrate between DCC and dataflow, creating a significant barrier to new and growing suppliers with limited resources.

uSmart is our efficient and cost–effective route to smart meter integration, letting you compete with the major utility suppliers and providing consumers with more choice. We've developed uSmart to be attainable no matter the size of supplier or how many customers you look after, with the ability to scale included from the start.

uSmart combines a fully accredited, DCC enabled software platform capable of evolving and scaling to your consumer needs, bolstered with the experience and expertise only we can deliver, guiding and **enabling your business to become smart meter ready.**

"We chose esg because of the unrivalled service they offer and the level of expertise they bring to the table."

42.5
million domestic smart meters needs to be installed to meet BEIS's expectations
