

Capitalise on Energy Data Insights

Financial reporting and settlements management services provide UK energy suppliers with industry expertise and data insights to improve financial performance and revenue recovery capabilities.

Overview

Why Consulting Services?

Energy suppliers are challenged by data and process errors that result in imbalances between purchases and sales. These imbalances lead to substantial revenue losses. ESG Consulting Services help suppliers make sense of complex industry datasets to correct these problems and improve financial performance.

Benefits

Unrivalled Expertise in Settlements Management

With more than 25 years of experience recovering revenue for energy suppliers, ESG Consulting Services provide unique insights on the root causes of complex data and operational challenges that have a negative financial impact on the business. We improve your financial performance today and build your internal capabilities to improve performance tomorrow.

Unlock Measurable Financial Value

Recover 1–2% of your energy costs by fixing errors and imbalances between purchases and sales. Consulting insights enable strategic corrective measures to reconcile today’s revenue losses and prevent future losses. Ensure customer bills are accurate, facilitating timely payments and enhancing your reputation for quality.

Gain Confidence in Your Data Capabilities

Achieve a concise, accurate, transparent, and up-to-date view of your energy data and financial position. With ESG Consulting Services, your leadership team will have peace of mind that company divisions such as finance and operations can overcome data access and analysis challenges to get accurate insights into business performance and improvement.

ESG Flow Manager™ Our Companion Software

Integrates and aggregates vast amounts of granular industry data into an accessible, clear format

Drills down into the data to identify errors and root causes

Presents the results in easy-to-understand reports to inform corrections and enable revenue recovery

Features

Dynamic Reporting Suite

Based on analysis of your datasets, ESG Consultants produce a comprehensive set of customized financial reports and deliver monthly commentary on your performance. We identify weak areas and pinpoint root causes of revenue losses.

Settlements Management

Through a collaborative approach, ESG Consultants help you prioritise actions and strategies to correct revenue leakage problems and enhance financial performance. We provide targeted training so that you are empowered to minimise future losses.

Meter Read Management

Concerned about meeting meter-read accuracy requirements and avoiding related penalties and business restrictions? ESG Consultants identify read accuracy problems across your portfolio and help you prioritise strategic actions to improve accuracy and maximise financial benefits.

Pre-Migration Health Check

In 2025, the UK energy market is implementing new charging and data methods known as Market-Wide Half-Hourly Settlement. To prepare, your data needs to be in the best shape possible. ESG Consultants can assess your data cleansing needs for a seamless transition.

Testimonial

“Over ten years, the Consultants have become an extension of our internal finance team, and we have developed an extremely collaborative relationship. Year after year, the financial benefits to our business continue to far outweigh the costs of their support.”

Saul Templar, Vice President Commercial Optimisation at SEFE Energy Limited
