

## ESG Consulting Services™

Take Control of your Data. Prevent Revenue Leakage.  
Recover 1%-2% of Energy Costs.

### Overview

Take control of your energy revenue and stop revenue leakage. Through ESG Consulting Services, our experts partner with you to identify, recover, and prevent lost revenue through revenue assurance, automated controls, and faster, audit-ready reporting. You get accurate numbers, revenue added back to your bottom line, fewer legacy reconciliations, and a shorter month-end close. Throughout the process, we share knowledge and best practice, so you create a strong, self-sufficient long-term financial position.

### What We Deliver

#### Recover Revenue and Prevent Leakage

Typically, 1-2% of annual energy costs recovered straight to your bottom line, with control embedded to prevent future leakage.

#### Real-Time Financial Control

A single, trusted view of financial and operational data for faster, accurate reporting and confident decision-making.

#### Break Silos, Unlock Team Value

Connect finance, operations, metering, and billing teams with shared data and insights. Break down silos, reduce handoffs, and drive evidence-based improvements.

#### Regulatory and Audit Confidence

Keep your organisation fully compliant with new regulations, such as MHHS, with documented controls, clear data lineage, and audit-ready evidence.

#### Capability That Lasts

We work alongside your teams, transfer best practice, and hand over ownership so your organisation can become self-sufficient in the long run.

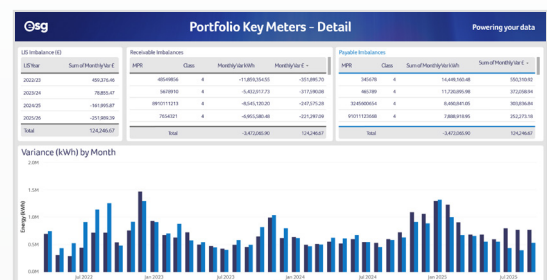

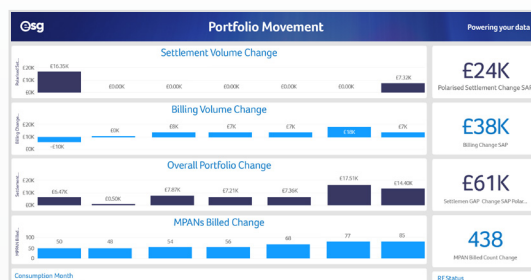

### ESG Flow Manager™ Our Companion Software

Integrates and aggregates vast amounts of granular industry data into an accessible, clear format.

Drills down into the data to identify errors and root causes.

Presents the results in easy-to-understand reports to inform corrections and enable revenue recovery.

## Why ESG?

ESG Consulting Services goes beyond traditional revenue assurance by addressing the root causes of revenue loss and putting you in control of your data. Our collaborative approach and advanced analytics eliminate silos, automate error detection, and embed long-term financial resilience across finance, billing, metering, and operations. We help your teams deliver reliable results, even as regulations and business needs change.

With over 20 years supporting the UK energy industry, our goal is to empower your organisation for ongoing success. We provide your teams with the insights, tools, and confidence to independently manage financial performance, achieve sustainable improvement, and maintain complete control.

**Over £18 Million**

**Recovered for  
Clients in 2024**

## The ESG Difference

The Consultants have become an extension of our internal finance team, and we have developed an extremely collaborative relationship. Year after year, the financial benefits to our business continue to far outweigh the costs of their support.

Saul Templar, Vice President Commercial Optimisation at SEFE Energy Limited

Our job isn't just to recover lost revenue, it's to help you understand exactly why it happened, put the right controls in place, and give you the tools to fix it for good. In energy, if you don't have control of your data, you don't have control of your business. We want you to reach a point where you're confident in your numbers and no longer reliant on outside consultants.

Richard Carnall, Head of Consulting Services, ESG

ESG's Consulting Team support Corona Energy with accurate views of monthly financial positions. This information is valuable in detecting and reconciling imbalances and providing a first sight of where settlements focus is required.

Phil Morton, Chief Financial Officer, Corona Energy
